PureTask — Cookie Policy

Effective Date: [TO BE SET BEFORE LAUNCH] **Version:** 2.0

This Cookie Policy explains how **PureTask LLC** (“**PureTask**”) uses cookies and similar technologies on our website and mobile applications (the “**Platform**”). It supplements our [Privacy Policy](#).

1. What Are Cookies?

Cookies are small text files placed on your device by websites you visit. Similar technologies include **local storage**, **session storage**, **pixels / web beacons**, **SDKs**, **device identifiers**, and **session-recording / heatmap scripts**. We use these to make the Platform work, to remember your preferences, to keep you signed in, to measure performance, and (where you have consented) to support marketing.

2. Categories of Cookies We Use

Category	Purpose	Examples	Can you disable?
Strictly necessary	Authentication, security, fraud prevention, load balancing, session continuity.	Auth tokens, CSRF tokens, session IDs.	No — Platform will not function.
Functional	Remember preferences (language, theme, last-used filters).	UI preferences, “remember me.”	Yes, via browser settings or cookie banner.
Performance / analytics	Measure usage, debug errors, understand feature adoption.	Lovable Analytics, error tracking.	Yes, via cookie banner, browser settings, or GPC.
Product research	A/B testing, feature flag management.	Experiment IDs, variant assignments.	Yes, via cookie banner.

Category	Purpose	Examples	Can you disable?
Session recording / heatmaps	(If used) Understand UI friction; record interactions on UI elements; do not record password fields.	(e.g., Hotjar, FullStory, LogRocket — if used)	Yes, via cookie banner.
Advertising / cross-context	Limited marketing measurement; (where used) personalized advertising.	Meta/Google conversion pixels, retargeting tags.	Yes, via cookie banner, browser settings, or GPC.

3. Specific Cookies and Technologies

A live cookie list is available at [/legal/cookies/list](#) and updated when we add or change cookies. Representative examples:

Cookie / Token	Provider	Purpose	Duration
pt_session	PureTask (first-party)	Authenticated session	Session
pt_csrf	PureTask (first-party)	CSRF protection	Session
pt_prefs	PureTask (first-party)	UI preferences	1 year
pt_experiment_*	PureTask (first-party)	A/B testing variant assignment	30 days
__stripe_mid	Stripe (third-party)	Fraud prevention on payment forms	1 year
__stripe_sid	Stripe (third-party)	Fraud prevention	30 minutes
sb-access-token	Supabase (third-party)	Authenticated session	Session / configured
sb-refresh-token	Supabase (third-party)	Session refresh	Configured
Lovable Analytics IDs	Lovable Analytics (third-party)	Usage analytics	Up to 2 years
OneSignal push	OneSignal (third-party)	Push notification	Until uninstall or

Cookie / Token	Provider	Purpose	Duration
token	party SDK, mobile only)	delivery	opt-out
Google/Meta pixel IDs (if/when used)	Google, Meta (third-party)	Marketing measurement, retargeting	Up to 13 months

4. First-Party vs. Third-Party

- **First-party cookies** are set by puretask.co and our subdomains.
- **Third-party cookies** are set by service providers such as **Stripe** (payment fraud prevention), **Supabase** (auth/session), **Lovable Analytics** (usage analytics), and any advertising or session-recording vendors we engage. Their use is governed by their privacy policies.

5. Mobile SDKs and App Identifiers

Our mobile app uses SDKs that may store identifiers on your device:

- **OneSignal** — push notifications (push token).
- **Stripe SDK** — payment fraud prevention (device fingerprint).
- **Crash and performance SDK** (e.g., Sentry) — error logs and stack traces.
- **OS-level advertising identifiers** — **IDFA (iOS)** and **AAID (Android)**. We do **not** use these for advertising unless you opt in.

Manage notifications: **iOS** Settings → Notifications → PureTask; **Android** Settings → Apps → PureTask → Notifications.

Manage advertising identifiers: **iOS** Settings → Privacy & Security → Tracking → toggle off PureTask; **Android** Settings → Privacy → Ads → Reset or Delete advertising ID.

6. Your Choices

6.1 Cookie Banner and Preferences Center

A cookie banner appears on first visit. A persistent “**Cookie Preferences**” link is in the website footer. Update your choices any time.

6.2 Browser Controls

Most browsers let you block or delete cookies. Disabling **strictly necessary** cookies may break the Platform. - **Chrome**: Settings → Privacy and security → Cookies. - **Safari**: Preferences → Privacy. - **Firefox**: Settings → Privacy & Security. - **Edge**: Settings → Cookies and site permissions.

6.3 Global Privacy Control (GPC)

We honor the **GPC** signal as an **opt-out of “sale” and “sharing”** under CCPA/CPRA. When GPC is detected, we do not place advertising or cross-context behavioral advertising cookies.

6.4 Do Not Track (DNT)

Because there is no industry consensus on DNT, we **do not currently respond to DNT signals**. We do honor **GPC**. This statement is provided under **California Online Privacy Protection Act (CalOPPA)**, Cal. Bus. & Prof. Code § 22575.

6.5 Mobile Device Settings

See Section 5 for iOS and Android instructions.

7. Withdrawing Consent

Withdraw consent for non-essential cookies at any time via: - The “**Cookie Preferences**” link in the footer; - Browser settings (to clear or block cookies); or - Enabling **GPC** in your browser.

Withdrawal does not affect lawfulness of processing before withdrawal.

8. Changes

We may update this Policy as our use of cookies evolves. Material changes posted with updated effective date.
